INTEGRATED MANAGEMENT SYSTEM POLICY

We are committed to provide products as per customer requirements. We actively consider the environmental impacts and potential impacts, including risks and potential risks while making decisions, and work to minimize the footprint on the environment and issues related to health and safety. Depending upon the changing scenario of the business, Q&HSE (Quality, Health, and safety, Environment) programs are adapted to meet the needs.

We have established, documented, implemented and maintained an Integrated Management Policy.

Our Integrated Management policy:

- Is appropriate to the scale and nature of its activities;
- Addresses its commitment with respect to quality, environment, health & safety as per the requirements of the standard;
- Includes a frame work for setting and reviewing quality, environmental, health & safety objectives and targets;
- Addresses our commitment to prevent injury, ill health, any damage/pollution to environment; and to take adequate measures to monitor, review and continually improve the Integrated Management system and its performance;
- Includes a commitment to comply with all statutory, regulatory and legal requirements.

The Integrated Management Policy is communicated within the organization through internal meetings, by displaying it at key locations throughout the workplace, by posting it at sites and is included in the employee training. Communications to external parties are through brochures and websites.

Printed copy of the policy will be made available to the public or any interested parties on written request to the Q&HSE Management Representative.

An insight about the organizational goals, objectives, targets, and key elements of the integrated management system are shared with new employees as part of their orientation.

During management review meetings, the executive management reviews the policy statement and key system elements to ensure its appropriateness, effectiveness and continuing suitability to the organization. Additional review of the IMS policy is carried out whenever there is change in the business plan, site location, corporate structure, production process, technology or/and change in statutory and regulatory legal requirements which are required to be complied with.
